Keymacro is a simple tool that allows you to use several keyboard shortcuts to perform different tasks or to make your computer work faster. You can use them easily in the context of Windows or Mac operating systems. You can choose a keyboard shortcut to open and close a document, select a window or folder, call a command or a macro, start the clock or display the system status, access a website, quit a program or start a playlist. You can also assign a keyboard shortcut to a file or any other program to run it directly by pressing the keyboard shortcut assigned to this file or program. Keymacro works with most of the file and folder windows and can even control the menu options, display buttons and control panels of each window. In addition, Keymacro lets you define shortcuts to insert text, copy text, cut text, paste text, select a part of a document, create a shortcut, open an URL or a command line, and much more. What's more, you can also download more items that enhance this software by installing the Keymacro plugin. Bottom line Keymacro is a simple and useful tool that allows you to use some of the most common keyboard shortcuts to perform various tasks in a convenient way.
